

## Extend RS-232 Peripherals Up To 1000 Feet Away

### Extend Your RS-232 Device Up To 1000 Feet Away From Your Computer

Now you can extend your RS-232 peripherals to a remote location 1000 feet away. Control your favorite Gefen products that use RS-232 or any other serial control devices that use RS-232. Touch panels that use RS-232 for data communication can now be located remotely with ease. All 9-pins are perfectly reproduced from one end to the other, so there is no worry of any data being excluded

#### Features:

- Extends any RS232 compliant device up to 1000 feet (300 meters) from the computer
- Only one CAT-5e cable required for extension
- Perfect for digital signage applications

### How It Works

The RS-232 Extender sender unit connects to your computer using the supplied cable. The extended RS-232 device connects to the receiver unit. CAT-5 cables connect the send and receive units - up to 1000 feet away. The sender is powered by a 5 volt power supply, which will also power the receiver via the CAT-5 cable.

#### Specifications:

- RS232 Input Connector: DB-9 female
- RS232 Output Connector: DB-9 male
- Link Connector: RJ-45 Shielded
- Conforms to the full 9-pin RS-232 standard
- Max. Data Transfer Rate: 115,200 baud
- Power Supply/Power Consumption: 5V DC @ 5W (Max)
- Dimensions: 1" W x 4" D x 1" H
- Shipping Weight: 3 lbs.
