

Glen sound GS-HA014 Power requirement

Hello there,

with respect to the GS-HA014, the power spec states that the DC input is 7 to 12V. The illustrated panel however states 9V.

Just need to confirm that a 12VDC 1 watt PSU would be suitable.

Also the spec states:

'Max current consumption: 1 Watt'

I believe should be 'Max power consumption'?

Please advise

Colin Hird

Subject: Glen sound GS-HA014

Hi Colin

The text should read 'Max power consumption:1W.'

The power supply requirement is correct.

One of our PSUs at 9V or 12V with 500mA is more than adequate.

Kind Regards

Marc Wilson
